

Please help our students become healthier.

Great Tasting Fuel for the Mind and Body!

Dear School Nutritionist/Dietician,

The USDA, SNA and the IOM claim our school aged children are not getting enough nutrition in their daily diet. Fruit 66 makes these drinks for our children, by providing up to two servings of fruit as part of a balanced meal or as a healthy snack. Fruit 66 is an excellent bridge to wellness, addressing childhood obesity and lack of nutrition. Fruit 66 is our number one choice for a low calorie, refreshing, great tasting and highly nutritious beverage.

Below, you will find information about each flavor as well as Item Codes to make it easy for you to request Fruit 66 from your beverage buyer for my child(ren) at our school. You can also contact Fruit 66 directly at info@fruit-66.com or call 1 866 929-0066.

Thousands of American schools, students, and parents are enthusiastic about this product and find Fruit 66 to be more refreshing and better tasting than the competition. We're asking for your support. All you need to do is carry the product we want to buy. Your students and parents will thank you for it.

Sincerely,

NAME
